

Become a Beta Tester

Ecopath with Ecosim 6 is looking for beta testers to help refine EwE6. Some of the benefits are:

- finding the latest features and functionality in EwE6;
- ensuring features continue to work throughout your development;
- work closely with the development team to incorporate features you may require.

We will send out announcements before any major releases. All we ask in return is to use the software during these announcements. To join please send an email to (ewedevteam at gmail dot com) with the subject "Be an Ecopath Beta tester" the

- i. number of years experience
- ii. how often does one use the software
- iii. major features used (Ecopath, Ecosim, Ecospace, Fit to timeseries, Mediation etc.)

Thank you very much for your time and corporation.

Regards,
EwE Development team
